Hult Center

Problem: What problem are you experiencing that might be solved by technology?: Traditional performing arts audiences are dwindling as it becomes more and more expensive to produce art and there are so many other forms of entertainment available for free. How can the Hult Center stay relevant and grow audiences using technology-mediated experiences?

Challenge: What technology do you think would solve this problem?: A/R, simulcast, participatory digital art projects?

Prize:What kind of prize would you offer for this Challenge?: No idea. I\'m open though. Cash, love, tickets...
